

PPN 06/21 Carbon Reduction Plan

Atalian Servest Limited confirms that it will exceed the government target of achieving Carbon Net Zero emissions by 2050.

Atalian Servest is committed to achieving Carbon Net Zero emissions by 2030.

Baseline year

Atalian Servest Limited has been measuring its carbon footprint since 2014. However, in 2020, Scope 3 emissions have been included for the first time. As a result, FY 2020 (January 1st 2020 to December 31st 2020) will become the baseline year.

In future years, Atalian Servest will report progress against the baseline emissions year (2020).

2021 year emissions

Carbon emissions for calendar year 2021 are as follows:

Category of emissions	Emissions (Tonnes kgCO ² e)	% Increase compared with baseline year
Scope 1	6260	9.6%
Scope 2	225	-5.6%
Scope 3 Emissions measured include: Category 4: Downstream transportation and distribution Category 5: Waste generated in operations Category 6: Business travel Category 7: Employee commuting Category 9: Upstream transportation and distribution	114642	0.35%
Total emissions	121123	0.78%

N.B. As a result of the Covid-19 pandemic, emissions for 2020 were lower than would otherwise have been expected. As a result, emissions this year have as expected risen slightly.

Emissions reduction targets

Atalian Servest Limited is committed to achieving Carbon Net Zero across Scope 1, Scope 2 and Scope 3 (see included categories above) by 2030. Progress to 2030 target may not be linear.

Emissions (Tonnes kgCO₂e)

Carbon reduction initiatives

For further information about the initiatives that will drive carbon emissions reduction, see <https://www.atalianservest.co.uk/carbon-net-zero-by-2030/>

Environmental management and certification

Atalian Servest uses a range of management and certification standards to manage carbon emissions. These include:

ISO 9001 Quality Management

ISO 14001 Environmental Management

ISO 50001 Energy Management

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SCER requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

Signed

Daniel Dickson, CEO, Atalian Servest Limited
